Vallone Design: "Kathy"

Best Three-Person Room

Though creating a three-person bedroom was a challenge, Scottsdale's Vallone Design was able to pull off a beautiful and functional space suited for a trio. "We managed to fit three full-size beds in our room, create a sense of personal space for each girl, provide more than adequate storage, a fun, funky bathroom and a great living space that all three girls can use comfortably," says designer Berkley Vallone. Bathroom tile from Waterworks, fabric by Designer's Guild and Diane Von Furstenberg bedding for Bed, Bath & Beyond were all used to fashion this stylish space. "Kathy" was named after Kathy Audette, a friend and co-worker the Vallone team lost several years ago. "Kathy was a bright, spunky spirit, a fighter, full of love and a true inspiration to us all," Vallone says. "We felt it appropriate that Kathy should be watching over these girls." www.vallonedesign.com.
